Diocese of Scranton Catholic School System invests $1 million in STREAM initiative

SCRANTON – While many parents and students have already heard of STEM education, the Diocese of Scranton Catholic School System is now taking its initiative even further.

In an ongoing effort to best prepare students for the 21st century and beyond, the Diocese of Scranton has been developing a new vision for Catholic education.

One of the key components of this new vision will be the integration of the STREAM (Science, Technology, Religion, Engineering, Arts and Mathematics) model of learning into the curriculum of all schools in the Diocese of Scranton Catholic School System beginning this academic year.

In order to equip educators with the tools necessary to be successful, the Diocese of Scranton has announced an investment of $1 million to incorporate STREAM into the curriculum of all 20 Catholic Schools by May 2022.

“STREAM is forward thinking, student-centered and cross-curricular,” Jason Morrison, Diocesan Secretary of Catholic Education/Chief Executive Officer, said. “It goes beyond traditional STEM programs. By including the Arts and Religion, we are adding creativity, communication and social responsibility rooted in our Catholic identity.”

Several resources have already been purchased for the initial implementation phase of the new STREAM initiative. BeeBots and Spheros robotics have been purchased to provide students an opportunity to practice computer coding and each school has already received PadCaster technology which will allow students to use an iPad to engage in video production, journalism and public speaking.

“National research has shown that the top areas of focus for K-12 schools are encouraging individual and critical thinking, preparing children to successfully enter the job market as well as preparing students for college,” Kristen Donohue, Superintendent of Catholic Schools, said. “STREAM will accomplish this goal for our students and more. Through a hands-on, project based approach students will also develop the critical skills of working collaboratively and effective communication.”

Over the course of the summer, many Diocesan teachers have already received professional development and training in STREAM-related concepts.

“As we officially launch our STREAM initiative, I am confident that this effort will fulfill our promise of excellence and allow each of our students to achieve his/her God-given potential,” Bishop Joseph C. Bambera said.

At All Saints Academy in West Scranton, administrators and staff have already started to embrace the STREAM initiative. Students as young as pre-kindergarten are now using BeeBots, small devices that resemble a bumble bee, which help teach computer coding techniques. Older students have STREAM periods several times a week.

“As we’re getting further and deeper into it, it’s more the idea that we don’t want to stick with the specific periods, we want to let them do it in their classrooms and make it part of the curriculum,” All Saints Academy Principal Brittany Krupski said.

On a recent visit to the school, first grade students were using Legos to build volcanoes in several different groups. As part of STREAM, before they started, the youngsters’ sketched designs like an engineer would, learned about how God created all things including volcanoes and formulated plans for their eruption using vinegar and baking soda.

“It truly gives them the tools they need to succeed. We’re trying to teach them about the 4 C’s, collaboration, creativity, critical thinking and communication, and these tools that were given to us allow us to head in that direction. They aid our teachers in making the lessons more interesting and more interactive,” Krupski said.

Diocesan Teachers’ Institute allows educators to share ideas

WILKES-BARRE – As a product of Catholic education herself, Shaina Dougherty is excited about the possibilities that STREAM education offers her students.

“STREAM is very critical to the ever-changing society in which we’re living,” Dougherty said during the Diocesan Teachers’ Institute which was held at Holy Redeemer High School on Monday, September 23.

As a sixth, seventh and eighth grade math teacher at LaSalle Academy in Jessup, Dougherty says STREAM-focused learning will help prepare students for jobs that have not even been created yet.

Dougherty is one of several educators that helped facilitate interactive break-out sessions for fellow teachers at the day-long Institute. During her presentation to colleagues, Dougherty showed off Sphero robots which can help students learn computer coding and other skills.

“This is something I’m very passionate about and something that I truly enjoy learning.” Dougherty added.

In a nearby classroom, All Saints Academy kindergarten teacher Molly Sullivan was also teaching her peers.

“As an educator, you want to share your knowledge with other teachers, you want to learn from other teachers and everybody has great ideas,” Sullivan said.

Sullivan explained how STREAM concepts can easily be added to the existing lesson plans that many teachers already have.

“The youngest kids actually sometimes know more about electronics than we do, so we can learn from them as well! Some of those children have been using iPads since they’ve been able to move their fingers so this is very second nature to them,” Sullivan explained.

While largely symbolic, the large gold ribbon was the culmination of a month-long series of activities inside the Lackawanna County Catholic School.

“We were recognizing this cause for the entire month of September,” Ann D’Arienzo, Our Lady of Peace School Principal, said. “Each homeroom also had a 16.9-ounce water bottle and they were filling it with dimes. If they filled it, each bottle is $100. We had a couple homerooms that did a couple different bottles!”

All of the money collected is being sent to the Jesse Rees Foundation which will use the donated funds to send “Joy Jars” to kids battling cancer.

“I’ve heard stories of little kids going and raising their home piggy bank which is what we’re all about, trying to get them to see community,” Dough had added.

Following the homily, all Catholic educators recited the Prayer of Commitment in which they asked God to strengthen their commitment to the ideals of Catholic education, using their talents and gifts to enrich the lives of their students, colleagues and extended school community.

Children helping children: Students raise awareness for pediatric cancer

CLARKS GREEN – If you see a pink ribbon, most people generally know it is meant to support breast cancer awareness but students at Our Lady of Peace School want you to know what a gold ribbon is for.

Gold is the color that signifies Childhood Cancer Awareness Month, which is recognized every September.

In an effort to spread awareness, students formed a large gold ribbon outside their school on Friday, September 27, 2019.

“I thought it would be nice to get all of our schools involved somehow in recognizing all of the children that are affected by cancer and their families,” Elizabeth Devine, Diocesan Elementary School Guidance Counselor said.

D’Arienzo said, “If we want to know what the star of a movie is, you go to your phone and you Google it, so information is readily at hand but how do we think about that information? How do we think critically?” Ferguson asked. “We need to be helping our students evaluate the information that comes to them, helping them to understand how to analyze it, how to create, how to synthesize with it in order to solve real world problems of which there are many.”

The Diocesan Teachers’ Institute began with Mass celebrated by Bishop Joseph Bambera at Saint Mary of the Immaculate Conception Church.

During his homily, Bishop Bambera urged educators to take care of the gift of faith.

“Nurture it, protect it and understand that for the gift of faith to flourish, we need to act upon it, we need to give our faith a life, a voice and a heart!” Bishop Bambera said.

The Bishop highlighted the contributions that the Catholic School System has made on the Diocese of Scranton. While acknowledging all the efforts of the past, Bishop Bambera said as the Diocese moves forward this is a time of growth.

“Today, I’m excited to say that the vision that has always sustained our Catholic Schools these past 151 years continues to evolve and take particular shape and form as we navigate the exciting and challenging waters of the 21st century with its explosion of knowledge and opportunity,” Bishop Bambera said.

Following the homily, all Catholic educators recited the Prayer of Commitment in which they asked God to strengthen their commitment to the ideals of Catholic education, using their talents and gifts to enrich the lives of their students, colleagues and extended school community.

Another said, “You have been assigned this mountain to show others it could be moved.”

“Our motto here is Excellence with Character and we model the Master Teacher and we reflect that to our students so they see what it is to serve other people,” D’Arienzo said.

Statistics from the Children’s Cancer Research Fund indicate that every year, more than 15,000 kids and young adults are diagnosed with cancer — approximately 43 per day. Cancer is the leading disease-related cause of death in children.

For Elizabeth Devine, this project was personal. Her 12-year-old nephew is waging a cancer battle.

“It’s very personal. We’re watching my nephew go through it and thank God he’s doing well but you see the impact on not just the child but on the family,” Devine said.

In addition to the Our Lady of Peace School students, Diocesan school students from Saint Mary of Mount Carmel School in Dunmore and All Saints Academy in Scranton also dressed in gold on Friday, September 27, to join in the effort.
The Diocese of Scranton is committed to educating our students in an environment that is academically excellent and facilitates the development of moral judgment and Christian decision-making. We are proud to share the following successes of our students in the classroom and in their service to others. Each day, our schools are fulfilling their mission of preparing today’s youth and young adults to become tomorrow’s faith-filled leaders.
